Personal Letter

I love looking for new answers and make differents things, i don't like wait for that the things happens and i always look for how do what i propose myself. I love make more for my job. I am strongly committed to being an agent of change, demanding myself to be disciplined and constant in my personal development. I am learning new skills and gaining experience. I want to be part a big company that give me a change to show what i am captable of do, that allows me to develop professionally, taking challenges that force me to become the best version of myself. It is a highly changing and increasingly fast-paced world, where competition pushes us to solve problems more effectively. I have what it takes to show that I can be an important part of an organization.
